THE "MACHINE" AND THE DEMOCRACY. The Democracy evidently understands

the dangers which its recent successes involve, and it is disposed to proceed cautiously. Witness the refusal of the New York Democrats to celebrate their victory, and a similar judicious resolution on the part of the California Democrats. But it is extremely questionable whether the saahead can guard the party against the operation of its own methods. It must be borne in mind that the Democratic party has never shown any disposition to do away with the spoils system. It has been so long out of power that whenever it gets and they have no other policy than to make hay while the sun shines. Democrats look forward at this moment with eager anticipation to the next Presidential campaign, fully expecting to capture the administration at that time. But they would find it hard to demonstrate the grounds upon which they expect once more to obtain that formerly Republican vote which this year has given them seven States all of which were supposed to be strongly Republican. This year the Republicans voted the Democratic ticket in order to put down "Boseism" in their own party. But the very fact that they did so shows that they are not at all likely to support the Democrats unless the latter prove themselves to be in earnest as re-

Reform of the Civil Service is now very generally understood to be the key to all other political reforms, and we may rest assured that when the parties are marshalled in 1884 the independent vote which Special arrangements are being made to give that this year has thrown the country into the hands of the Democrats will refuse to vote for any ticket which does not represent a real determination to abolish the spoils system. It is therefore necessary to see how the Democrats stand on this issue. In the first place it must be perceived that their "Bosses" have not yet been repudiated, and that all the elements in their organizanal by one of the most talented and popular of Eu- tion which correspond to those just sloughed off by the Republicans, are still vigorous and at the political front. And this is a very important consideration, for powerful in its descriptive phases, and to have a plot | it must handicap the party heavily during the next two years, and so render it less fit than it should be to enter the Presidential race. The Democrats in Congress will probably not try to change any of the political methods they find in vogue. Tney will naturally follow the example of their opponents in making the most capital possible out of their position. They will desire re-election, and to secure it they will freely employ the Federal patronage whenever they are able to do so. They will in short prefer what is called "prac-"tical politics" to the theories of Civil

Service reform.

will have committed themselves thoroughly to the spoils system long before 1884, and that no matter what professions they may make then they will be discredited before the country. Now under ordinary circumstances perhaps this would not hurt them much, because under ordinary circumstances there would be no room for untheir opponents. But if the Republican Bosses" are really and finally suppublican party-an element which the independent vote can repose confidence in. and which it may be induced to support. four pounds may be sent by mail as fourth class Of course we do not lose sight of the possibility that the Republican leaders may, notwithstanding the defeat of this year, continue to blunder. We fully understand that it is within the power of these leaders to adopt a policy which will make a Democratic victory in 1884 certain, unless a third party superior to both the old ones should meantime come into existence. But we are justified in assuming that so suicidal a course will not be followed; that the Republican leaders will recognize the true significance of the revolution which has occurred, and that they will do | Whitney (R.) nothing to make the position of their party

worse than it is. If the Republicans do not help the Democrats, as they helped them this year, the question is whether the Democrats can so guide their course as to inspire confidence in the independent vote. In order to do this they must declare themselves opposed to the spoils system, and they must do more than make promises. It is true that they have another opportunity; that by a judicious tariff reform policy they can strengthen themselves greatly; but it is not at all certain that they can harmonize upon that subject, and judging from their past action they are more likely to temporize upon it than to take decided ground. Even with a judicious tariff reform policy, nevertheless, they will be expected to declare for Civil Service reform. And we do not believe that they can make this sacrifice. For the Democracy is suffering from all the diseases which afflict the Republican party. It has no vantage ground in any respect. It has as corrupt elements, as foolish leaders, it is as much under "machine" rule, it is as destitute of principles and convictions. In fact it needs regeneration fully as much as its rival, and it is about to be exposed to temptations which no corrupt old party

can be expected to withstand successfully. We have seen how, time and again, partial Democratic successes have been nullified by swiftly succeeding blunders of the most serious character. It has THE Grass Valley Tidings believes that the next sion that the proper leaders of the party Callehan (D.), Charles A. Murdock (R.), J. We do not see any reason of grave consequence is to ascertain if he is taithful for believing that the National Democracy in small things, and wishes that test to be applied is capable of that thorough regeneration which can alone commend it to the independent voters in 1884. As we have said, it cannot hope to rise upon its unaided merits. Even should it succeed relative to the movements of the railroads. The San Francisco Chronicle still makes abortive efforts to escape from the inexora ble logic of the political situation. The RECORD-UNION asserts that the late elec tion in this State conclusively proved the gacious counsels of those who look farthest anti-railroad howl to be condemned by public opinion. Nichol says it was at a time when the Democrats were making dilatory motions and the Republicans were about to introduce an amendment to the House rules to over-come the difficulty, and the Democrats feared that Keifer would recognize the motion to amend rather than a dilatory motion; that in such case he was to be taken from the hair by force, and the men were picked to

Washington, November 231,-The Indian Office is in receipt of a report from Agent Wilcox, of the San Carlos Agency, giving a detailed account of the system of counting the Indians every day. He says the system was inaugurated October 18th, and that the highest number reached was 1,236. Each Indian is marked with a tag and number, and the Indian's name is recorded in a register kept for the purpose. One of the good results derived from tagging the Indians is to know which Indians engage in raids or leave

the reservation. The Department has, at the request of Agent Armstrong, of the Crow Indian reservation, placed a sufficient force around the reservation to prevent the raids of the Piegane, who have, the agent states, robbed the Crows of horses to the amount of \$20,000.

It was most important, he said, that the people should know cost against the tenant for ejectment would be very light, except when increased by their own fault, ac.ing, in some instances, on bad advices. The Arrears of Rent Act was the greatest benefit Parliament had ever extended to an unfortunate class of people. It would be giving them more than they had expected if the outstanding costs were paid. Up to the 221 instant the evictions were only half those in any previous month during the year. The Government, Trevellyn said, would not underestimate the distress along the west Sale of Choice Oil Paintings coast of Ireland, and he would not cease to watch for evidences of suffering until the next harvest had been gathered. He had ordered the most minute reports from seven counties. FRED. SCHAFER, R. G. HOLDREDGE, D. The Government did not intend to advance money for public works, as that would be a most extravagant method of relief, and would af ord no real alleviation of the distress. During the great famine in I e'and, 3,000,000 persons were fed for six months by the direct or law relief for £500,000. That sum would feed them only six weeks by means of public works enterprises, The Government now ntended to conduct the system of relief with an efficiency that would give the most posi-

THE STAGE BALD-HEAD.

Most everyone who was not born blind knows that the stage bald-head is a delusion and a snare. The only all wool, yard wide bald-head we remember on the American stage is that of Danstan Kirke, as worn by the veteran Couldock. Effic Eilssler wears her own hair, and so does Couldock, but Couldock wears his the most. It is the most worn anyhow. What we started out to say is, that the

stage bald-head and the average stage whiskers make us weary with life. The stage bald-head is generally made of the internal economy of a cow, dried so that it shines. and cut to fit the head as tightly as a potato sack would naturally fit a billiard cue. It is generally They (N. Y.), Nevember 23d.—The old four shades whiter than the red face of the wearer, or vice versa. We do not the wearer, or vice versa. We do not know which is the worst violation of eternal fitness, the red-faced man who wears a deathly white bald-head or the pale proved a failure. Of fifty-nine pits in this dis- actor who wears a florid root on his intelcountry and playing ten or fifteen hundred engagements, a bald-head gets soiled. We OMAHA, November 23d.—Two hundred and thirty men of the Fifteenth Infantry, from New Mexico, leave Denver to-morrow for St. needs a sheep dip shampoo. Another feature of this accessory of the stage is its singular failure to fit. It is either a little short at both ends or it hangs over the skull in large festoons and wens and warts in such a way as to make the audience believe that the woarer has dropsy of the

You can never get a stage baldhead near enough like nature to fool the average house by. DIED .- Yesterday at the County Hospital there died an aged colored man named Robert Fisher, who was well known among owners of racing stock throughout the entire State. He was 63 years of age. The direct cause of his death was consumption, although he has been ailing with rheumatism and other diseases for some time. Deceased was a professional horse-shoer, and for a number of years was in attendance at all races and fairs for the purpose of shoeing the stock. Of late years, until he became unable to work, he was em-ployed in a blacksmith shop on Second street. He left no property, and a number of citizens have contributed to a fund for his burial,

THE MYSTERY OF COMETS' TAILS.

The cometary displays of the last two the spirit of astronomical speculation as to uttered. the causes of comets' tails and their mysterious movements. An English scientist in the October number of the Philosophical Magazine propounds a novel theory to explain these phenomena. The forces on which he relies to make out his theory are the force of gravity which urges the comet toward the sun, the expansive force of the sun's heat, and the resistance of an invisi-ble atmosphere surrounding the sun at imuation. Transactions on December account showed an average advance of at least a cent \$\preceq\$ ctl over yesterday's rates. Sales embrace 500 tons No. 1 Feed, December, \$1 48\preceq\$; 800 do, \$1 48\preceq\$; 100 do, \$1 48\preceq\$; 100 do, \$1 48\preceq\$; 100 do, \$1 50\preceq\$; 100 tons No. 1 Feed, which give rise to its tail begin with the emission of jets of gas, in the direction determined by the expansive force of the sun's heat acting on the comet. But soon these jets bend round, as if carried back by a strong wind, forming an envelope asked. mense distances. The changes in a comet s at the Grain Exchange of 100 tons No. 1 | round the body of the comet and a cone behind it, as would happen to a man vacation. dressed in a loose robe and running rapidly against the wind. The jets of gas escaping from the body of the comet and expandi when they leave it are more resisted by the sun's atmosphere than its more solid heat, the comet's envelope and conical form behind the head. According to this view the body of the comet is constantly moving through the vapors it throws off, and thus produces the appearance of a tail by leaving each successive part thrown off more and more behind it. After passing its perihelion the comet carries its tail before it instead of behind it, he says, because while moving toward the sun it is perpetually passing from a rarer into a denser medium, while in receding from the sun it is perpetually passing from a denser into a rarer medium. The fact that the most rapid alteration in the direction of comets' tails necessarily occurs just when the expansive force of the sun's heat is most felt gives plausibility to this hypothesis. There can be little doubt that, as Mr.

The recent inquiry of Dr. Siemens into the conservation of solar energy also lends color to the theory that comets, when near the flags. of the invisible solar atmosphere. The re-cent inquiry of Dr. Siemens into the con-American flag, 345 under the British flag sun, may encounter a resisting medium, which would account for the phenomena in question as the writer referred to supposes. But astronomers are yet far from solving the old problems of the origin and eccentric behavior of comets' tails. "There seems to be," says Mr. Huggins, "a rapidly growing feeling among physicists that both the self-light of comets and the phenomena of their tails belong to the order of electric phenomens." This view, in order to account for the carrying away of the comet's tail under an electrical repulsion exerted by the sun, necessitates the supposition that the sun is strongly electrified, either positively or negatively, and also that, in the changes going on in the comet, the matter thrown off by the nucleus has tom is limited, owing to high ruling rates. We quote: California, 50@52½c; Eastern, 37½@42c & become strongly electrified in the same way as the sun. Otherwise the attraction on one side of every particle of the comet would be precisely equal—as Herschel points out—to the repulsion on the opposite side, and we should therefore be at a loss to explain the enormous velocity with which the matter of the tail is carried

Hot drinks are especially hurtful to the stomach. They caus irritation of the nerves of the stomach, and the fire at the Potrero-street railroad stables, on the 28th of last month, was from consequent mild inflammation of that organ, so that after a hot drink the stomach is red and congested. In time a debilitated condition is set up. A temperature of 100° Fahr, also destroys the active ferment of the gastric juice (pepsin) and so leads to indiges-tion. If the stomach is at all disordered, hot drinks give rise to much griping pain, and in many cases to vomiting. In cases of diarrhæa, too, hot drinks only increase it, while cold ones tend to lessen it. An Internal Revenue Officer Saved

PROVIDENCE, August 21, 1882. DITOR OF BOSTON HERALD-DEAR SIR : During my term of service in the Internal Revenue Department of the United States, at the time my office was in this city, I was afflicted with a evere attack of Kidney Disease, and it times suffered intensely. I received the medical advice of some of our best physicians for a long time, without couraged by the failure of the doctors to help me, and being urged to use HUNT'S REMEDY by a friend who had tested its merits, although reluctant to try a patent medicine. I was finally induced to the standard of the stand to try a patent medicine, I was finally induced to try the REMEDY, and procured two bottles of it. and commenced taking it faithfully according to the directions.

Before I had taken it three days the excruciating pains in toy back had disappeared, and before I had from over-exertion or a violent cold, the pains in my kidneys return, a few doses of HUNT'S REMEDY

quickly effects a cure. Before closing I beg to mention the remarkable ure of a friend of mine in New York City, to whom recommended this valuable medicine. He was suffering severely from an attack which was proounced by his physician a decided case of Bright's Disease of the Kidneys. I obtained two bottles of HUNT'S REMEDY for him, and he commenced taking it, and began to improve at once, and was speedrestored to health, and he attributes the saving of his life, under the blessing of a merciful Providence, to HUNT'S REMEDY.

Another friend of mine in New York, to who recommended HUNT'S REMEDY, was suffering severely from kidney disease, and was entirely cured of it after using this wonderful medicine only

Feeling deeply grateful for the great benefits exerienced by my friends and myself from the use of HUNT'S REMEDY, I feel it to be my duty, as well as a great privilege, to furnish you this voluntary and unsolicited statement of facts for the informs tion of your large number of readers, many of whom are undoubtedly suffering from this widely spreading scourge, and I believe that it is the best mediine now known, and that it will cure all cases of kidney diseases that can be cured. I shall be pleased to confer with any one who may

desire an interview regarding the statements herein ontained. Truly yours, RICHMOND HENSHAW, 99 Messer street. n6-3tMWF&swW
